Computer Science Studio

Unit 1 - Computing Systems | Grade 7

Knowledge check: 10 questions, 1 point each. Choose one answer for each question. Use only the facts taught in the unit. Your teacher will tell you whether to use the on-site readings. Practical performance is assessed separately.

1. What should you choose before testing a device?

A. An unsupported conclusion

B. A task and success criteria

C. A different device for every trial

2. Which record is useful evidence for a short text test?

A. I like the device color.

B. Someone said all devices are fast.

C. The edited sentence and button feedback appeared in each of three trials.

3. The short text test succeeds. Which limit belongs in the report?

A. Long video editing was not tested.

B. This proves every possible task works.

C. No limits need to be reported.

4. Which pairing correctly identifies hardware and software?

A. Hardware: Text Pad; software: keyboard

B. Hardware: keyboard; software: text editor

C. Hardware: browser instructions; software: screen

5. The task is recording an audio message. Which fictional combination meets all requirements?

A. Device A + Text Pad

B. Device A + Voice Pad

C. Device B + Voice Pad

6. For a typed announcement with a lower-battery goal, which recommendation uses the supplied facts?

A. A + Text Pad: both text pairings work, and A uses less battery for text.

B. B + Voice Pad: text editing does not matter.

C. A + Voice Pad: a microphone is not needed for editing.

7. In the paused-editor case, what is the observed symptom?

A. The device has no keyboard.

B. No sentence appears after Send sample.

C. All school files are deleted.

8. Why test one possible cause at a time?

A. To avoid observing any results.

B. To change as many things as possible.

C. To connect a change with its result.

9. Pause is on and Wi-Fi is connected. Which solution is best supported and safest?

A. Resume practice typing, then send the sample again.

B. Delete files before testing anything.

C. Bypass school controls.

10. Which help message gives enough information to follow the solution?

A. It is fixed somehow.

B. No text appeared; Wi-Fi was connected and pause was on; I resumed and resent; text appeared.

C. Computers never have problems.
